

Python Basics

Python Source Code:

```
# Print a welcome message
print("Welcome to the Python Basics Program!")

# Take input from the user
name = input("Enter your Name: ")
college = input("Enter your College Name: ")
branch = input("Enter your Branch: ")

# Display the entered information
print("\n----- Student Information -----")
print("Name      :", name)
print("College   :", college)
print("Branch    :", branch)
```

Program Output Screenshot:

```
Welcome to the Python Basics Program!
Enter your Name: Sanjeev Pandey
Enter your College Name: Maharaja Surajmal Institute
Enter your Branch: BBA

---- Student Information ----
Name      : Sanjeev Pandey
College   : Maharaja Surajmal Institute
Branch    : BBA
```

This program demonstrates the basics of Python input and output. It prints a welcome message and takes the student's name, college name, and branch as input. The entered information is then displayed in a formatted manner.
