

Task 6: Power BI Dashboard

The Power BI dashboard should be prepared using the cleaned dataset from Task 3.

Major Findings from the Dashboard:

- Sales show an overall increasing trend over the displayed period, with the highest sales toward the end of the period.
- Technology has the highest sales among the displayed departments, followed by Furniture, Office Supplies, and Consumer Electronics.
- The South region contributes the highest share of sales, followed by Southeast, West, Central, and Northeast.
- Consumer is the highest-performing segment by sales, followed by Corporate, Home Office, and Small Business.

- The dashboard shows variation in sales across different regions, indicating differences in regional performance.
- Customer-level sales vary considerably, with some customers contributing substantially more to total sales than others.
- The dashboard allows performance to be analyzed interactively using Region, Department, Segment, Country, State, City, and Date Range filters.
